

Erosion Eel™

Hanes Geo Components Erosion Eel is a sediment control device constructed of a high strength outer fabric filled with environmentally safe recycled rubber.

Hanes Geo Components Erosion Eel has a low profile and is easily moved with the attached handles. Can be reused.

Options: 9.5" & 20" diameter by 10' lengths.

Installation: Quick and easy. Can be simply laid on top of ground. Staking may be required in channels.
